COLLABATHON SERIES

8 week
schedule

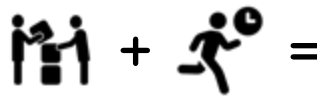

Actionable
Outputs

Actionable Outputs

- 3-5 personas to inform product development of Hylo, the community platform for regenerative agriculture
- User journey maps- Potential individuals who can represent the personas
- Feature development of Hylo

COLLABATHON

A sustained collaboration effort with short sprints in service of long range shared goals

GOAL

To develop the digital community platform for regenerative agriculture. This series will establish parameters for participants including communities within Hylo, OpenTEAM and Regen Network to work together to shape this community platform.

ABOUT THIS SERIES

What if our community and all those who want to support more regenerative agriculture had a community platform built for them to collaborate, learn, and grow together? Participants will work together to shape Hylo to be the digital community platform for regenerative agriculture. This Collabathon will help enable and activate:

- Community among farmers
- Community between farmers and the public
- Deeper connection between people and their landscapes & bioregions
- A greater flow of resources towards regenerative outcomes

Co-Hosts

Clare Politano, Terran Collective
Neha Sharma, Terran Collective
Laura Demmel Gilmer, OpenTEAM
